Ready link                                      Licensed Vocational Nurse                      1999– 2001

- Performed the duties of a nurse in various hospitals according need
- Dealt with public in a professional manner
- Worked in all areas of the hospital

Additional Info:

Most of my adult life I was a heavy equipment mechanic for various Caterpillar companies. I worked as a field mechanic and had to perform all aspects of repair in the field on my own. I dealt with the public in various capacities.

As a nurse I have worked with registry on my own in many different hospitals.

As I have primarily worked on my own in hospitals and in the field setting I have become acutely aware of the need to work in a safe healthy environment. As the Health and Safety Manager I will endeavor to promote and maintain a safe and healthy work environment for all employees. I will acquire all needed education and experience so as to be the very best I can be.
